

# CS 130

## In Class Assignment

Create a responsive webpage that loads its data from Professor Patterson's laptop's database but is hosted on your local laptop.

access to the database:  
network IP address: TBD

```
username = "username"
password = "password"
database = "phpdemo"
table = "images"
```

structure of table:

```
`id` int(11) unsigned NOT NULL AUTO_INCREMENT,  
`url` varchar(256) DEFAULT NULL,  
`alt` varchar(256) DEFAULT NULL,
```

Each entry in the tables should have it's own <div>

Each div should have CSS properties of “float:left” and a width and height of your choice.
